# EDRS 811 Quantitative Methods ( 001 ) in Educational Research

#### George Mason University, Graduate School of Education

#### **Dr. Dimiter Dimitrov**

Class Meeting: Robinson Hall, Room A325; Tuesday, 4:30 – 7:10 PM FALL, 2005

Office: Robinson Hall, Room A343
Phone: (703) 993-842
Office Hours: T & TH 10:11:30 A.M.
E-mail: ddimitro@gmu.edu

Other hours may be arranged by appointment.

#### **Course Description**

The main purpose of this course is to develop in the students an understanding of statistical ideas and procedures required for conducting correct statistical analysis and applications of quantitative methods in the practice of educational research. The course will reinforce and build upon concepts and skills acquired in EDRS 620. Students will learn through a combination of text reading assignments, hands-on experience in using a computer program for data analysis, and application activities. Students will be expected to identify and report on quantitative methods used in published research (articles), to collect and analyze data using the Statistical Package for Social Sciences (SPSS), and to provide written reports of methodology and results. *Prerequisites:* Successful completion of EDRS 620 (or its equivalent) or permission of instructor.

<u>Course Methodology:</u> This course consists of lectures, large group discussion, in class activities, and individual/group assignments.

#### **Required Texts**

Hinkle, D., Wiersma, W, & Jurs, S. (2003). Applied Statistics for the Behavioral Sciences (5th. ed.), Houghton Mifflin Company, Boston: MA. ISBN: 0-618-12405-5.

#### **Course Requirements**: It is expected that each of you will:

- (1) Read all assigned materials for the course.
- (2) Participate in classroom activities that reflect critical reading of materials.
- (3) Complete two in class assignments and HW assignments.
- (4) Design and conduct a pilot research study
- (5) Present the pilot research study in class in a poster format.
- (6) Attend each class session.

#### **Course Evaluation**

**1. In class/Homework Assignments:** Students will be asked to work individually on homework assignments throughout the semester.

#### 2. Midterm Examination (Closed books and notes)

**3. Pilot Research Study:** This course requires students to develop and conduct a pilot-research study in an educational setting. This study is intended to reflect what you have learned from this course. It should be written in a way that one would submit for a national professional conference paper presentation. Other requirements for this course are designed to build up bases for the final pilot research proposal. Research papers must be handed in on time and must adhere to the APA Publication Manual Guidelines.

#### This pilot research study will be divided into 6 sequential parts.

- 1. Identify broad topic of interest; conduct a literature review; discuss significance of the proposed study; state purpose and hypotheses.
- 2. Methods describe sample, measures to test hypotheses, procedures and data collection, design of the study, data analysis.
- 3. Write the results section.
- 4. Discussion and Conclusion.

The presentation of the final paper will take place the last day of class in a research paper format (APA style, see also guidelines posted on the AERA website, <a href="www.aera.net.org">www.aera.net.org</a>.) After completing the research study, reflect on that experience. What did you learn from it? How do you think course material helped you carry out the study?

#### 4. Final Examination: Semi-comprehensive (closed books and notes) examination

**5. Class Participation and Attendance Policy:** Because of the importance of lecture and discussion to your total learning experience, I wish to encourage you to both attend and participate in class regularly. Attendance, punctuality, preparation, and active contribution to small and large group efforts are essential. These elements of your behavior will reflect the professional attitude implied in the course goals and will account for 10% of your course grade. With reference to the grading scale described later in this syllabus, you will note that this percentage is equivalent to a full letter grade. Students who must miss a class must notify the instructor (preferably in advance) and are responsible for completing all assignments and readings for the next class.

### RUBRIC FOR PARTICIPATION AND ATTENDANCE

		LEVEL OF PERFORMANCE		
ELEMENT	Distinguished	Proficient	Basic	Unsatisfactory
	(4-5 pts.)	(3 pts.)	(2 pts.)	(1 or 0 pts.)

## **Grading Policy**

Class Participation and Attendance	5 pts.
Individual Homework Assignments	10 pts.
Pilot Research Study	30 pts
Midterm Examination	25 pts.
FINAL EXAMINATION	30 pts.

TOTAL	100 pts
-------	---------

#### Letter grades will be assigned as follows:

A+	98-100%	A	93-97.49%	A-	90-92.49%
B+	88-89.49%	В	83-87.49%	B-	80-82.49%
C	70-79.49%	F	below 70%		

#### **Honor Code**

All evaluations and homework will be taken under the GMU Honor Code. Students are expected to abide by the honor code set forth in the current edition of the Student Handbook. All exams, assignments and papers are honor work. That means that students must not give nor receive any unauthorized assistance. While members of a team may collaborate on written paper assignments, they may not give or receive assistance from other teams. Plagiarism is also a violation of the honor code. The University's Honor Code guidelines for academic honesty are at: http://mason.gmu.edu/~montecin/plagiarism.htm

#### **Learning Disabilities**

Students with any type of documented disability that may interfere with their learning in this class may negotiate a reasonable accommodation with the instructor. If you have not contacted the Office of Disability Services, and you have a disability please make sure to register for services.

	Reading from text	Chapter
Aug. 30	Measures of central tendency, variation, and normal distribution	1, 2, 3, 4
Sept. 6	Confidence intervals and testing hypotheses for one-sample mean and proportion	8, 9, 10
Sept. 13	Confidence intervals and testing hypotheses for two-sample means and proportions	11, 12
Sept. 20	Correlation and simple linear regression	5, 6
Sept. 27	Practical applications using SPSS	Handouts
Oct. 4	One-way analysis of variance (ANOVA)	14
Oct. 11	Columbus Day Recess	
Oct. 18	MIDTERM EXAMINATION	
Oct. 25	Multiple comparison (post-hoc) procedures	15
Nov. 1	Two-way analysis of variance	16
Nov. 8	Multiple linear regression	18
Nov. 15	Multiple regression for ANOVA purposes	Handouts
Nov. 22	Analysis of covariance (ANCOVA)	19
Nov. 29	Pretest-posttest comparisons. Chi-square tests for frequencies	Handouts, 20
Dec. 6	Project presentations	
Dec. 13	FINAL EXAMINATION
