Here are some guidelines for quizzes. **Note:** The list below is not meant to be all-inclusive.

**NOTE:** Make sure that you have checked your book against the publisher’s book errata sheet and made corrections as appropriate.

1. Review all homework assignments. Use homework assignments as a study guide.
2. Review previous quizzes to get a sense of the type of questions that are asked.
3. Review and answer the “review questions” at the end of each chapter.
4. Understand the examples shown throughout each chapter as well as the examples covered in class.
5. Lectures and corresponding class discussion.
6. Completed project assignments.
7. Your notes from the lectures should serve you as a good list of topics to know.
8. Complete all of the reading assignments. Reading assignments serve as a good list of concepts to understand and know.
9. Keep in mind that the quizzes (and exams) are closed book, closed notes and no calculators are permitted unless otherwise indicated.
10. Check the useful links page for additional reference information.
