

Patterns that Grow

S^3 Post Discussion

- Which portions of the lesson did you use?
(Staircase problem, Growing I, Growing T,
Growing U, Internet Applet, Reflection
Questions)

- What materials/strategies did your students use?
- How did the materials/strategies help or hinder their problem solving?

Work from Stacy's class on staircase problem (4th grade)

Steps	Cubes
1	1
2	3
3	6
4	10
5	15
6	21
7	28
10	55
25	325!

Nice job!

*used a calculator like 1+2+3+4+5+
6+7+8+9+
= 325*

I like how you showed this!

By Lauri
Sonsteyn

1. Steps Cubes 2.

1	1
2	3
3	6
4	10
5	15
6	21
7	28
10	

$$+2+3+4+(5+6+7+8+9+10)$$

Cool!

55

And $40+10+5=55$

3.

I just drew 55 cubes, and labeled them.

Good job!

1									
2	1								
3	2	20							
4	13	21	28						
5	14	22	29	35					
6	15	23	30	36	41				
7	16	24	31	37	42	46			
8	17	25	32	38	43	47	50		
9	18	26	33	39	44	48	51	53	
10	19	27	34	40	45	49	52	54	55

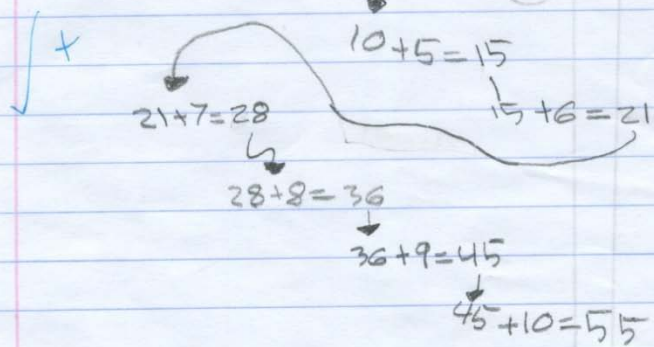

Nick
The 10 step
I I did with
cubes and like
this

Steps	Cubes
① 1	1
2	3
3	6
4	10
5	15
6	21
7	28
<hr/>	
⑧ 8	36
9	45
10	55

Good job

like $1+1=2$,
 $3+3=6$,
 $6+4=10$

Pictures from Erika's class (1st grade)

The Growing T

-What's the rule?
The T grows by add 1 □.

-What's the magic number?
4

Look!

step	number of □	equation
1	5	$1 + 4 = 5$
2	6	$2 + 4 = 6$
3	7	$3 + 4 = 7$
4	8	$4 + 4 = 8$
5	9	$5 + 4 = 9$
6	10	$6 + 4 = 10$

The Growing T

-What's the rule?
The T grows by add 1 □.

-What's the magic number?
4

Look!

step	number of □	equation
1	5	$1 + 4 = 5$
2	6	$2 + 4 = 6$
3	7	$3 + 4 = 7$
4	8	$4 + 4 = 8$
5	9	$5 + 4 = 9$
6	10	$6 + 4 = 10$

The Growing U

- What's the rule?
The U grows by adding 2 □.
- What's the magic number?
(2)

Look!

step	number of □	equation
1	5	$5 + 2 = 7$
2	7	$7 + 2 = 9$
3	9	$9 + 2 = 11$
4	11	$11 + 2 = 13$
5	13	$13 + 2 = 15$
6	15	$15 + 2 = 17$

The Growing U

Names: Dora van Steen Mina

3	9	$3 + 6 = 9$
4	10	$4 + 6 = 10$
5	11	$5 + 6 = 11$
6	12	$6 + 6 = 12$

The Growing I

The Growing I

Names: _____

The Growing I

Names: _____

The Growing I

-What's the rule?
The I grows by adding 1□

-What's the magic number?
6

Look!

Step	number of □	equation
1	7	$1 + 6 = 7$
2	8	$2 + 6 = 8$
3	9	$3 + 6 = 9$
4	10	$4 + 6 = 10$
5	11	$5 + 6 = 11$
6	12	$6 + 6 = 12$

The Staircase

-What's the rule?

The staircase grows by adding 1 row and 1 block

-What's the magic number?

There is no magic number because it is a zig-zag pattern.

Look!

step	number of □	equation
1	1	$1 + 1 = 2$
2	3	$3 + 3 = 6$
3	6	$4 + 6 = 10$
4	10	$5 + 10 = 15$
5	15	$6 + 15 = 21$
6	21	

6 + 15 = 21

5

6

The Staircase

Names: _____

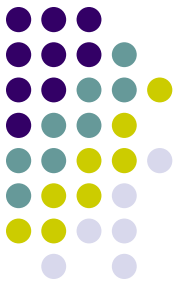

The Staircase

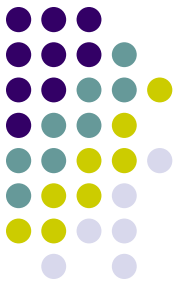

- What understandings did students demonstrate? What did they struggle with?

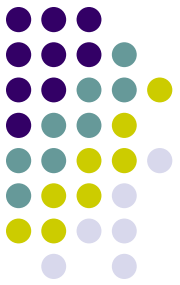

- What modifications did you make for struggling and/or advanced learners?

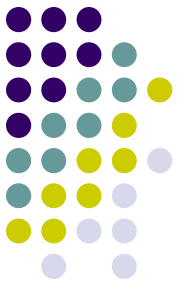

- What were the strengths of the lesson?
- What were the weaknesses?

- What would you change about the lesson?

- What comments did observers share?

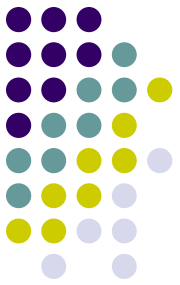

- Are students making progress with the goals of communicating clearly and respectfully?
How did this lesson contribute?

- Are students making progress with the goals of becoming flexible and persistent problem solvers?

How did this lesson contribute?

- Any questions or final thoughts?
