

Fractions to Decimals - What do you notice about the decimal representation of the fractions? Write a rule about when the decimal representation repeats and when the representation will terminate.

	Fraction	Equivalent fraction with denominator a power of ten.	Decimal representation	Calculator	Percent
1					
2					
3					
4					
5					
6					
7					
8					
9					
10					

Test your rule! Which of these fractions will terminate and which will repeat?

$$\frac{14}{31}$$

$$\frac{27}{29}$$
