Mission and Phases

Our goal is to develop new technology and to provide inspiration and opportunity for students for the purpose of developing new ideas, products and services.

We desire to develop and implement new ideas and we desire that these ideas are applied towards the benefit and well being of mankind.

We desire to combine available intellectual and technological resources at GMU and in the community abroad to enhance and accelerate development in new technology and implementation of new or existing technology.

We desire to provide workshops and training to foster the development of new ideas, and to provide training and guidance in the processes from concept to market.

We desire to continue to develop and expand to become a self supporting, interdependent, efficient research and development organization.

Phase I  Go through the entire design-to-market process with a low cost, marketable product and become a self supporting organization.

Phase II  Refine the integration of various departments, organizations, resources and the community into the Students Center for Innovations.

Phase III Work with professionals willing to volunteer to guide and mentor students in research and development, design and patenting, and business and marketing.

Phase IV Create an independent business entity to facilitate the Students Center for Innovations.

Phase V Obtain a room or facility, or build a facility dedicated as the Students Center for Innovations, which will be a place for all innovative student organizations to work together in developing their technological and entrepreneurial ideas.
