

The following textbook package has been adopted for CHEM 211...

Title: *General Chemistry, 8/e*

Authors: Ebbing/Gammon

ISBN: 0-618-53994-8

Publisher: Houghton Mifflin Company

Web Address: college.hmco.com/students

As you have likely discovered in other courses, making a habit of reading and review is a formula for success that will prepare you for lectures, homework assignments, quizzes, and tests. Some of the outstanding features of the *General Chemistry, 8/e*, text are:

- **Real-World Application: "A Chemist Looks At"** boxes highlight applications of chemistry to medicine/health, frontiers of science, the environment, and everyday life. You immediately see how the material relates to your future career, your world, and your life.
- **Problem Solving:** Ebbing and Gammon have a consistent, integrated, and proven approach to problem solving in their text and accompanying technology program.

The accompanying student support package provides access to a variety of study tools, including:

Media Guide for Students: This guide provides information and access to the technology resources available with the Eighth edition. Includes a user name and password to SMARTHINKING™ live, online tutoring, a user name and password for the students web site, and information about Eduspace®. The media guide includes the following:

- **Student Web Site (access via chemistry.college.hmco.com/students):** Organized by chapter, the student web site enriches, enhances, and facilitates learning by taking the text's three main themes – problem solving, understanding concepts, and visualization -- to an interactive level. Some resources on the web site include:
 - Visualization, Practice, and Tutorial Tools
 - Houghton Mifflin's ACE self-quizzing
 - Flashcards of key terms and concepts
 - Glossary from the text
 - An interactive periodic table
- **The Student CD-ROM:** A student tutorial resource, supports the goals of the Eighth Edition by helping you visualize molecular behavior and review concepts. It includes resources such as interactive tutorials with videos and animations.
- **SMARTHINKING live, online tutoring:** This online service provides personalized, text-specific tutoring and is available during typical study hours when students need it most: Sunday-Thursday from 2pm-5pm and 9pm-1am EST. With SMARTHINKING, students can submit a question to get a response from a qualified e-structor, usually within 24 hours; use the whiteboard with full scientific notation and graphics; preschedule time with an e-structor; view past online sessions, questions, or essays in an archive on their personal academic homepage; and view their tutoring schedule. E-structors help students with the process of problem-solving rather than supply answers.
- **EduSpace On-Line Learning Tool:** Eduspace is powered by the Blackboard™ online learning system and includes all of Blackboard's powerful features for teaching and learning. You will learn how to:
 - Complete homework assignments and tests online
 - Communicate with your instructor and fellow students in a number of different ways
 - View your grades in the Gradebook
 - Access live, online tutoring from SMARTHINKING

Also included in this package:

Student Solutions Manual: This helpful manual provides solutions to all in-chapter exercises, as well as solutions to odd-numbered practice problems, general problems, and cumulative skills problems, plus answers to review questions.

Study Guide: Contains a list of key terms and their definitions, diagnostic tests, summaries of major concepts and operational skills, additional practice problems, and post-tests.

Save money by purchasing this package! The study guide is FREE!
