

## Saber-Tooth Curriculum Fables and Burma-Shave Signs

**Fable 1: Science isn't the only way to find truth, examine a story for its lesson.**

Tell a story...  
take a break...  
from doing science...  
at the lake...  
design, design, design.

**Fable 2: Decide what to teach by looking at what the community needs; don't declare your lessons to be magic.**

Silly rabbit...  
magic isn't for kids...  
the community need...  
will do the deed...  
design, design, design.

**Fable 3: Live what you learn, learn what you live.**

Experience a day...  
living in the hay...  
that's not learning...  
for today...  
design, design, design.

**Fable 4: Separate knowledge from living experience because it gets abstract; don't turn knowledge in to something sacred.**

Don't bow down...  
to your crown...  
take it in stride...  
enjoy the ride...  
design, design, design.

**Fable 5: Don't carve practice into stone; keep it fluid.**

Don't get stuck...  
in the muck...  
keep it flowing...  
the earth is growing...  
design, design, design.

**Fable 6: Don't make work, keep true to the learner's needs.**

Busy work...  
is a jerk...  
turn the page...  
get them engaged...  
design, design, design.
