The Goopation of Garpon Activity
Using Multiple Intelligences to Process "The Know"
Presented by: Melissa Ferro

The Goopation of Garpon

To survive in this world, everyone must be familiar with garpon. In order to use garpon successfully, it must be goopated often. Goopation begins with oxporation. Oxporation can only take place once every proquar. To oxporate, you must mix zorzine with cafon and stir gently. When the oxporation is complete, add garpon and the mixture will spontaneously goopate. Goopation can take from 12 to 14 spomanes. You will know the garpon is goopated when it fuzzles.

1. What do you need to survive in this world?

2. How does goopation begin?

3. What do you need to oxporate?

4. How does the mixture goopate?

5. How long does goopation take?

6. How will you know when the garpon is goopated?

Author notes that activity has been adapted from: *The Montillation of Traxoline* by Pat Wolfe (1996).

Sample of Musical/ Rhythmic Intelligence
The Goopation of Garpon
(Sung to the tune of "Clementine")

Goopate your garpon,
Goopate your garpon
Very often, just like so.
Take the zorzine, and the cafon,
and stir gently don't you know.
Oxporation only take place
Every proquar, so take care
Watch the timer and on the proquar
Begin the process if you dare.
Add you garpon to the mixture
and spontaneously
After 12 to 14 spomanes
it will goopate properly.
You will be finished when it fuzzles
and then you will be glad,
Because being without garpon
would be very, very sad.

Workshop Activity:

Work with a partner (or two) to create **1** "Goopation of Garpon"
activity that:

- Demonstrates the process of Goopation
- Highlights at least 1 of Gardner's intelligences
  (preferably the one you picked)
- Uses technology (if possible)
- Present your activity to the group
