│                                      │  DONE    │       │
│                                      └──────────┘       │
└─────────────────────────────────────────────────────────┘
```
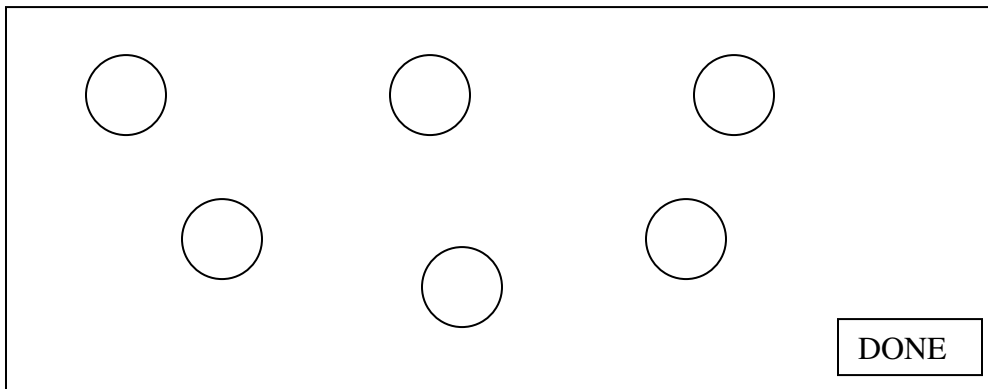

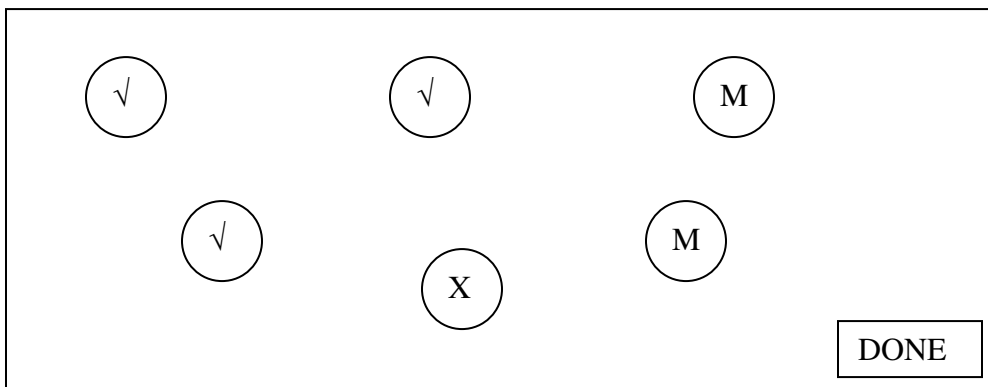

Learner is instructed to find the hotspots related to conducting a Check Roof/Rib.

1. When they find a spot, the screen zooms into the area. 3 questions are presented relating to:
   a. How to check
   b. Tool to check
   c. Consequences

┌────────────────────────┐
│ Decide whether to   │
│ indicate when spot is │
│ found (e.g. pointer   │
│ turns to hand). Then   │
│ click.   │
└────────────────────────┘

```
┌─────────────────────────────────────────────────────────┐
│                                                         │
│     (√)            (√)               (M)                │
│                                                         │
│          (√)            (X)       (M)                   │

│                                      └──────────┘       │
└─────────────────────────────────────────────────────────┘
```

√ = Correct
X = Incorrect
M = Missed, did not find

Click the Done button when they think they've completed the test. Feedback will identify what was missed and/or what was answered incorrectly and number answered correctly.

If they pass the test then they are returned to Lesson Menu.

If they miss items or answer incorrectly, then they are sent to Events Menu.
Feedback: Since you have not mastered the Pre-assessment, please take the time to complete all the events. (Make some kind of safety consequence statement)
