EOS 656/EVPP 652/GEOG 570 - The Hydrosphere

Homework #7: Groundwater

- 1) Texas has many different aquifers. Find at least two long groundwater table timeseries from different aquifers in Texas, and plot them.
- 2) Do a little background research and write a few sentences about the characterizes of these aquifers. Provide a map to indicate where the aquifers are located and something about their geology, rainfall, etc.
- 3) Does the data you got from hydrodesktop make sense for the kind of aquifer it observes? Write a short analysis.
