

Pink got me thinkin'
use your whole brain if you wanna drive a Lincoln
Asia, abundance, automation too,
Here's what pink says we gotta do:

--CHORUS--

The simple thing about A Whole New Mind

Is learning that the right brain is a fundamental find

Use the 6 small parts; you'll be so smart

I hope your MOPEDs don't fail to start.

The first of the six is a special kind of mix
Between concepts and symbols; You'll become so nimble
Bending back and forth will give it more worth.
You'll have more rein with meaning in your brain.

It's no longer good enough to have all the parts
But put them all together and you'll have all the smarts.
Just know how systems work - that's the biggest perk.
Your symphony will play and you'll see the light of day.

Play is a tool for solvin problems
Keep play in your day and you won't be so glum
Games are the literature of the 21st century
Watson don't ya know that this elementary.

You just can't lose if you use your views
To put yourself in someone else's shoes.

Make sense of their world to help them come uncurled.

Having **empathy** every day will help you pave your way.

Design comes near the end and according to Rashid

There are three types of beings trying to succeed

Those who create culture and those who buy

A third don't give a (bleep) so he ain't fly

--CHORUS--

Story brings it home cause we got no memory

Wanna pass a test, stories make memory not temporary

Whether business or healing, stories can contribute a lot

We are our stories, there's some food for thought

Pink got me thinkin'

use your whole brain if you wanna drive a Lincoln

Asia, abundance, automation too,

That's what pink says we gotta do:
